

WINDOW CERAMIC FILM AT ITS BEST.

EVOLO
CERAMIC FILM

TECHNOLOGICALLY

ADVANCED WINDOW FILM

EVOLO Ceramic Film brings you the latest global technology in an IR window film that outperforms all other films. Ceramic technology means maximum achievable heat reduction and a stylish looking film. Plus, its outstanding optical clarity enhances your view, both day and night.

EXCEPTIONAL CLARITY & ANTI-EMI PROPERTIES

EVOLO Ceramic Film is a 100% colour stable film. Its optical clarity results from the engineering of nanotechnology, to create a ceramic composition so small that, not only is it invisible to the naked eye, it cannot even be detected under regular microscope. The film is 100% metal free so it will not cause electromagnetic interference (EMI) with electronic devices such as GPS, car radios and mobile phones. Not only does it block up to 99.9% of harmful UV rays it has been designed to enhance the overall look and feel of your vehicle.

PRODUCT ADVANTAGES

- Latest Global Ceramic Technology means superior optical clarity, lighter appearance.
- Eliminates EMI (Electromagnetic Interference) a symptom of some metalised films.
- Significant protection against harmful UVA and UVB rays.
- A tough durable film that unlike many other high performance films, won't fade or discolour.
- Delivers a dramatic reduction in solar heat passing through the glass as well as significant glare reduction and maximum protection from harmful UV rays.
- Independently tested and certified by ARPANSA (Australian Radiation Protection and Nuclear Safety Agency).

ADVANCED CERAMICS ENGINEERED TO OUTPERFORM

87% infrared heat rejection (IR)

99.9% UV ray rejection

60% heat rejection

60% glare reduction

100% metal-free

38% visible light transmitted

BLACK/GREY colour
